Why is there free DLC. Thats not how DLC works.. Shear AWESOMENESS !! Graphics are Outstanding, and the Game-play is intense !!. Who in the heck names a city after rocks that form inside your butt.

No but seriously the game isn't that good, just read my main review, same criticisms apply.

5/10. + Fun gameplay

+ Fun weapons

- Incomprehensible story arc. I only know I'm here to destroy the machines before they destroy me. Beyond that, no idea.. Hard Reset: Exile DLC

fast game with modern day graphics with easy controls that moves from location A to B to C and so on, good amount of action and special effects

good game.

Personal Suggested Purchase Price: \$0.49 Or Less During Sale. Great game... and now with free [DLC..what?!. While the main game had 7 levels, this free DLC bought that up to 12. The original Bezoar levels depicted a dystopian cityscape with a robot incursion, but in this DLC you will be exploring the barren plains outside, taking the fight to the robots as you unravel a lot more at stake than what it initially seems.](#)

[The storyline is a direct continuation from the main game, complete with its own cut-scenes and a new type of menace, the airborne drones. You can expect a good build up along the way, along with more questions than answers in regards to the plot, plus a suitable wrap up with a climatic boss fight.](#)

[You will need to install this DLC if you wish to complete the storyline or achievements, but since this DLC is completely free, I can hardly think of a reason not to get it. Good going by the developers in releasing this for free, more studios should follow in their example on how to treat their customers.. I hate payable DLCs. But this one is free! And it adds great stuff, too!. Excellent shooting gaming, short but fun.. Gives much welcome extra length and content.](#)

Love the game.. If you haven't played this yet and you like old school style shooters then you might want to give this a look, Although its very basic its lots of fun, think Serious Sam in a cyberpunk city and your get the Idea. Also the dev has been great first he give a free upgrade to the extended edition and now the Exile DLC is free of charge.. Fast, fun and very enjoyable little old-school shooter. It is a little short and the graphics can sometimes be a little confusing (sometimes it's hard to distinguish between the blinky lights of a terminal and the almost identical blinky lights of a psychotic kill-droid...) but they hold up pretty well considering it's 3 years old. It also has quite a nice self-aware sense of humour about itself too. Well worth checking out.. you can beat this game in about 6 hours on easy

I did hard but it took like 2 days

graphics are candy to the eyes. Very nice game.... A very good techno-punk game!. EXILE VILIFY? Free DLC for me.
